

AmpliVue®

Anytime, Anywhere Molecular Assays

HSV 1+2 ASSAY

Announcing . . . *AmpliVue HSV 1+2!*

Quidel's new AmpliVue HSV 1+2 Assay is a qualitative diagnostic test for the rapid detection and differentiation of Herpes simplex virus type 1 and 2. Our proprietary isothermal Helicase-Dependent Amplification gives customers the excellent performance of molecular testing and eliminates the need for capital equipment and isolation rooms.

AmpliVue HSV 1+2 is an easy-to-use, easy-to-interpret, disposable Cassette that provides rapid results in approximately 1 hour.

For more information contact Quidel Customer Service at: 800.874.1517 or your local Quidel Account Manager.
