

BacT/ALERT™

WORKSAFE™

Blood Culture Safety **First** and **always.**

BacT/ALERT® is the **only** system that offers **plastic** blood culture collection bottles and improves safety at every step. Lightweight bottles can be sent through pneumatic tube systems without special holders. Why trust your samples to breakable glass bottles?

Strong Outside, Strong Inside

Plastic. Fantastic!

Break resistant

Lightweight: weighs 1/2 to 2/3 less than glass.

“OSHA makes it clear: using glass in the laboratory when an equivalent plastic alternative is available must be justified in writing.”¹

Multi-layer, gas-impermeable design

Specimen Collection. Safety Adapters.

Multiple options to fit into a variety of protocols

- Bell shaped adapters
- Luer lock adapters
- Subculture adapters

Transport. Storage. Disposal.

Weights less for easier transport and shipping

Pneumatic transport without a special container

Ergonomic design

More space efficient storage

Multi-layer, gas-impermeable design

Less costly biohazard disposal
